

Parents Maths Calculations Workshop 19.1.23

Aim: to share maths calculations strategies in LKS2

National Curriculum 2014

Mathematics – key stages 1 and 2

Purpose of study

Mathematics is a creative and highly inter-connected discipline that has been developed over centuries, providing the solution to some of history's most intriguing problems. It is essential to everyday life, critical to science, technology and engineering, and necessary for financial literacy and most forms of employment. A high-quality mathematics education therefore provides a foundation for understanding the world, the ability to reason mathematically, an appreciation of the beauty and power of mathematics, and a sense of enjoyment and curiosity about the subject.

Aims

The national curriculum for mathematics aims to ensure that all pupils:

- become **fluent** in the fundamentals of mathematics, including through varied and frequent practice with increasingly complex problems over time, so that pupils develop conceptual understanding and the ability to recall and apply knowledge rapidly and accurately.
- **reason mathematically** by following a line of enquiry, conjecturing relationships and generalisations, and developing an argument, justification or proof using mathematical language
- can **solve problems** by applying their mathematics to a variety of routine and non-routine problems with increasing sophistication, including breaking down problems into a series of simpler steps and persevering in seeking solutions.

Mathematics is an interconnected subject in which pupils need to be able to move fluently between representations of mathematical ideas. The programmes of study are, by necessity, organised into apparently distinct domains, but pupils should make rich connections across mathematical ideas to develop fluency, mathematical reasoning and competence in solving increasingly sophisticated problems. They should also apply their mathematical knowledge to science and other subjects.

National Curriculum 2014

Lower key stage 2 – years 3 and 4

The principal focus of mathematics teaching in lower key stage 2 is to ensure that pupils become increasingly fluent with whole numbers and the four operations, including number facts and the concept of place value. This should ensure that pupils develop efficient written and mental methods and perform calculations accurately with increasingly large whole numbers.

At this stage, pupils should develop their ability to solve a range of problems, including with simple fractions and decimal place value. Teaching should also ensure that pupils draw with increasing accuracy and develop mathematical reasoning so they can analyse shapes and their properties, and confidently describe the relationships between them. It should ensure that they can use measuring instruments with accuracy and make connections between measure and number.

By the end of year 4, pupils should have memorised their multiplication tables up to and including the 12 multiplication table and show precision and fluency in their work.

Pupils should read and spell mathematical vocabulary correctly and confidently, using their growing word reading knowledge and their knowledge of spelling.

The purpose of mathematics in our school is to develop:

- positive, enthusiastic and inquisitive attitudes towards the subject
- an awareness and appreciation of the relevance and importance of mathematics in the real world
- competence and confidence in using and applying mathematical knowledge, concepts and skills
- an ability to solve problems, to reason, to think logically and to work systematically and accurately
- initiative and motivation to work both independently and co-operatively with others
- confident communication of maths where pupils ask and answer questions, openly share work and learn from mistakes
- an ability to use and apply mathematics across the curriculum and in real life
- an understanding of mathematics through a process of enquiry and investigation

Thus, children will be able:

- to make an active contribution to their own learning, by developing the skills of independence and enquiry
- to develop a clear understanding of the language of mathematics
- to become thinkers and problem-solvers
- to develop an understanding of the ways in which information is gathered and presented
- to develop a positive and confident attitude towards mathematics
- to develop logical thinking and reasoning, enabling them to record work clearly and in a variety of ways
- to develop the skills, knowledge and understanding needed in daily life

We'll look at the Parents section later.

<https://whiterosemaths.com/>

As a school, we follow White Rose Maths for maths planning and apply their Calculation Policy.

Base 10 and place value counters are the most effective manipulatives when subtracting numbers with up to 4 digits.

Ensure children write out their calculation alongside any concrete resources so they can see the links to the written column method.

Plain counters on a place value grid can also be used to support learning.

<p>Encourage daily counting in multiples, supported by a number line or a hundred square. Look for patterns in the six times table, using manipulatives to support. Make links to the 3 times table, seeing how each multiple is double the threes. Notice the pattern in the ones within each group of five multiples. Highlight that all the multiples are even using number shapes to support.</p>																																																																																																								

Year 4: 7 times table

Skill: 7 times table						Year: 4																																																																																																			
						<p>Encourage daily counting in multiples both forwards and backwards, supported by a number line or a hundred square. The seven times table can be trickier to learn due to the lack of obvious pattern in the numbers, however they already know several facts due to commutativity. Children can still see the odd, even pattern in the multiples using number shapes to support.</p>

Encourage daily counting in multiples both forwards and backwards. This can be supported using a number line or a hundred square. Look for patterns in the nine times table, using concrete manipulatives to support. Notice the pattern in the tens and ones using the hundred square to support as well as noting the odd, even pattern within the multiples.

Year 4: 11 times table

Skill: 11 times table						Year: 4																																																																																																				
11	22	33	44	55	66	<p>Encourage daily counting in multiples both forwards and backwards. This can be supported using a number line or a hundred square.</p> <p>Look for patterns in the eleven times table, using concrete manipulatives to support. Notice the pattern in the tens and ones using the hundred square to support. Also consider the pattern after crossing 100</p>																																																																																																				
77	88	99	110	121	132																																																																																																					
						<table border="1" style="width: 100%; border-collapse: collapse; text-align: center;"> <tr><td>1</td><td>2</td><td>3</td><td>4</td><td>5</td><td>6</td><td>7</td><td>8</td><td>9</td><td>10</td></tr> <tr><td>11</td><td>12</td><td>13</td><td>14</td><td>15</td><td>16</td><td>17</td><td>18</td><td>19</td><td>20</td></tr> <tr><td>21</td><td>22</td><td>23</td><td>24</td><td>25</td><td>26</td><td>27</td><td>28</td><td>29</td><td>30</td></tr> <tr><td>31</td><td>32</td><td>33</td><td>34</td><td>35</td><td>36</td><td>37</td><td>38</td><td>39</td><td>40</td></tr> <tr><td>41</td><td>42</td><td>43</td><td>44</td><td>45</td><td>46</td><td>47</td><td>48</td><td>49</td><td>50</td></tr> <tr><td>51</td><td>52</td><td>53</td><td>54</td><td>55</td><td>56</td><td>57</td><td>58</td><td>59</td><td>60</td></tr> <tr><td>61</td><td>62</td><td>63</td><td>64</td><td>65</td><td>66</td><td>67</td><td>68</td><td>69</td><td>70</td></tr> <tr><td>71</td><td>72</td><td>73</td><td>74</td><td>75</td><td>76</td><td>77</td><td>78</td><td>79</td><td>80</td></tr> <tr><td>81</td><td>82</td><td>83</td><td>84</td><td>85</td><td>86</td><td>87</td><td>88</td><td>89</td><td>90</td></tr> <tr><td>91</td><td>92</td><td>93</td><td>94</td><td>95</td><td>96</td><td>97</td><td>98</td><td>99</td><td>100</td></tr> </table>	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25	26	27	28	29	30	31	32	33	34	35	36	37	38	39	40	41	42	43	44	45	46	47	48	49	50	51	52	53	54	55	56	57	58	59	60	61	62	63	64	65	66	67	68	69	70	71	72	73	74	75	76	77	78	79	80	81	82	83	84	85	86	87	88	89	90	91	92	93	94	95	96	97	98	99	100

Times tables

Expectations for times tables for each year group:	
Year 1	Count in multiples of 2, 5 and 10. Recall and use all doubles to 10 and corresponding halves.
Year 2	Recall and use multiplication and division facts for the 2, 5 and 10 multiplication tables, including recognising odd and even numbers.
Year 3	Recall and use multiplication and division facts for the 3, 4 and 8 multiplication tables.
Year 4	Recall and use multiplication and division facts for multiplication tables up to 12x12.
Year 5	Revision of all times tables and division facts up to 12x12.
Year 6	Revision of all times tables and division facts up to 12x12.

TTRS Parent Guide will be emailed to you.

Parent Guide

We recommend a "little and often" approach; 3 minutes practice a day, 4 or 5 times a week is a good target.

What are the different Game Modes?

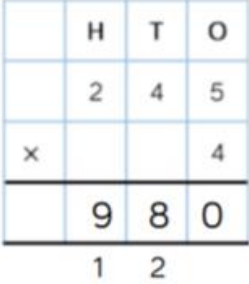

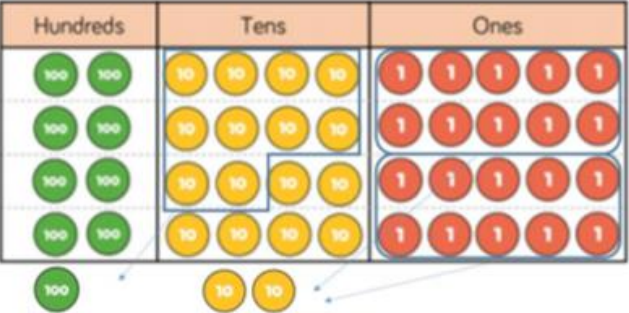

Single Player

Jamming 4 or 8 coins/correct answer	The only game mode without a timer, players chose the table and operation (\times or \div or both) they want to practise. Answer 10, 20 or 30 questions.
Gig 10 coins per correct answer	Gig games last 5 minutes and contain up to 100 questions, which come in 'waves', starting with the 10s, then the 2s, 5s, 3s, 4s, 8s, 6s, 7s, 9s, 11s and 12s. Novices are not expected to get past the 5s. Gigs provide the child (and their teacher) with a simple measure of their current skills, which is why learners should concentrate fully for the whole Gig as they won't get another try until next month.

Multiplication

Multiply 2-digit by 1-digit numbers	3/4	Place value counters Base 10	Expanded written method Short written method
Multiply 3-digit by 1-digit numbers	4	Place value counters Base 10	Short written method

$$245 \times 4$$

Skill: Multiply 3-digit numbers by 1-digit numbers			Year: 4
		<p>When moving to 3-digit by 1-digit multiplication, encourage children to move towards the short, formal written method.</p> <p>Base 10 and place value counters continue to support the understanding of the written method.</p> <p>Limit the number of exchanges needed in the questions and move children away from resources when multiplying larger numbers.</p>	
$245 \times 4 = 980$			

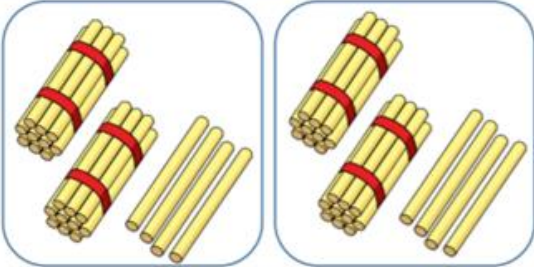

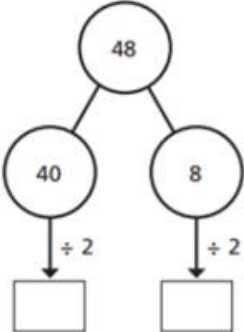

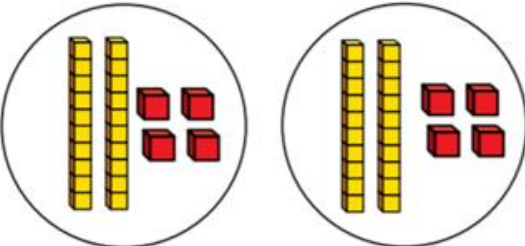

Division

Divide 2-digits by 1-digit (no exchange sharing)	3	Straws Base 10 Bar model	Place value counters Part-whole model
Divide 2-digits by 1-digit (sharing with exchange)	3	Straws Base 10 Bar model	Place value counters Part-whole model

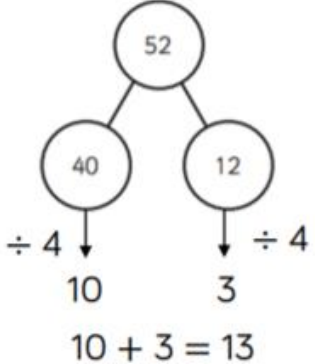

Division

Skill	Year	Representations and models	
Divide 2-digits by 1-digit (sharing with remainders)	3/4	Straws Base 10 Bar model	Place value counters Part-whole model
Divide 2-digits by 1-digit (grouping)	4/5	Place value counters Counters	Place value grid Written short division
Divide 3-digits by 1-digit (sharing with exchange)	4	Base 10 Bar model	Place value counters Part-whole model
Divide 3-digits by 1-digit (grouping)	4/5	Place value counters Counters	Place value grid Written short division

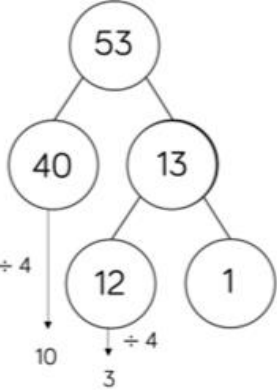

$$48 \div 2$$

Skill: Divide 2-digits by 1-digit (sharing with no exchange)		Year: 3						
<table border="1"><thead><tr><th>Tens</th><th>Ones</th></tr></thead><tbody><tr><td>10 10</td><td>1 1 1 1</td></tr><tr><td>10 10</td><td>1 1 1 1</td></tr></tbody></table>	Tens	Ones	10 10	1 1 1 1	10 10	1 1 1 1		When dividing larger numbers, children can use manipulatives that allow them to partition into tens and ones.
Tens	Ones							
10 10	1 1 1 1							
10 10	1 1 1 1							
	$48 \div 2 = 24$	Straws, Base 10 and place value counters can all be used to share numbers into equal groups.						
		Part-whole models can provide children with a clear written method that matches the concrete representation.						

$$52 \div 4$$

Skill: Divide 2-digits by 1-digit (sharing with exchange)	Year: 3/4																												
 <table border="1" data-bbox="619 568 1105 836"><thead><tr><th>Tens</th><th>Ones</th></tr></thead><tbody><tr><td>1 rod</td><td>2 units</td></tr><tr><td>1 rod</td><td>2 units</td></tr><tr><td>1 rod</td><td>2 units</td></tr><tr><td>1 rod</td><td>2 units</td></tr></tbody></table> <table border="1" data-bbox="1228 644 1538 746"><tr><td colspan="4">52</td></tr><tr><td>?</td><td>?</td><td>?</td><td>?</td></tr></table> <p data-bbox="955 848 1319 929">$52 \div 4 = 13$</p>  <table border="1" data-bbox="1156 943 1559 1236"><thead><tr><th>Tens</th><th>Ones</th></tr></thead><tbody><tr><td>1 rod</td><td>2 units</td></tr><tr><td>1 rod</td><td>2 units</td></tr><tr><td>1 rod</td><td>2 units</td></tr><tr><td>1 rod</td><td>2 units</td></tr></tbody></table>	Tens	Ones	1 rod	2 units	1 rod	2 units	1 rod	2 units	1 rod	2 units	52				?	?	?	?	Tens	Ones	1 rod	2 units	1 rod	2 units	1 rod	2 units	1 rod	2 units	<p>When dividing numbers involving an exchange, children can use Base 10 and place value counters to exchange one ten for ten ones. Children should start with the equipment outside the place value grid before sharing the tens and ones equally between the rows.</p> <p>Flexible partitioning in a part-whole model supports this method.</p>

1 ten rod	3 ones units																				
1 ten rod	3 ones units																				
1 ten rod	3 ones units																				

$$52 \div 4$$

Skill: Divide 2-digits by 1-digit (grouping)

Year: 4/5

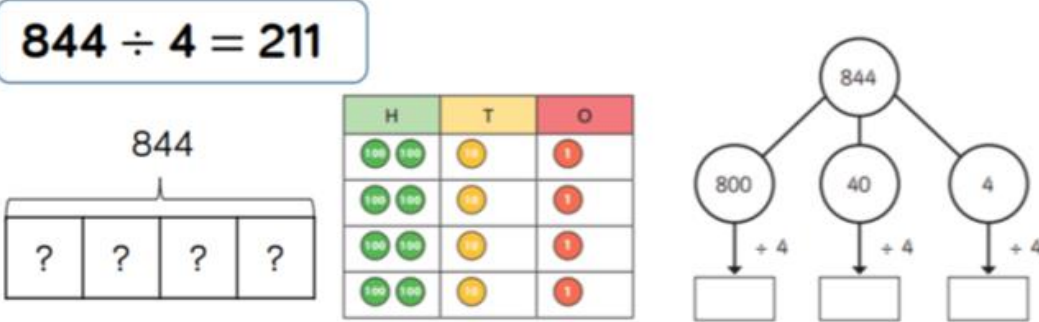

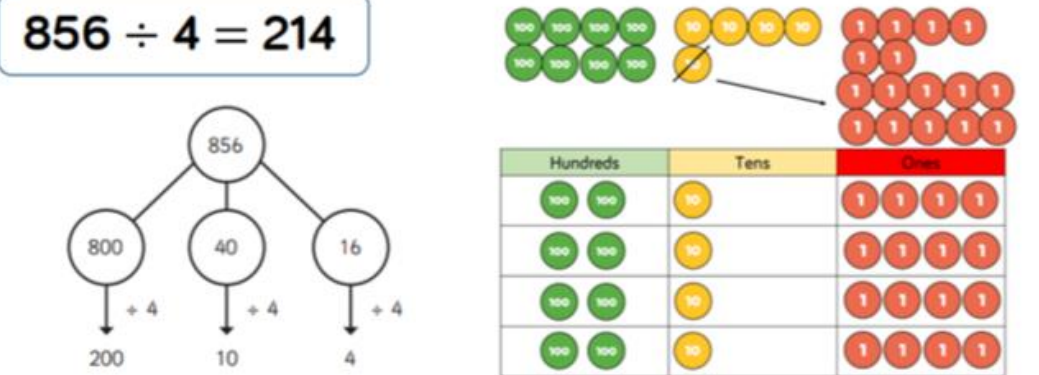

$$52 \div 4 = 13$$

When using the short division method, children use grouping. Starting with the largest place value, they group by the divisor.

Language is important here. Children should consider 'How many groups of 4 tens can we make?' and 'How many groups of 4 ones can we make?'

Remainders can also be seen as they are left ungrouped.

844 ÷ 4 and 856 ÷ 4

Skill: Divide 3-digits by 1-digit (sharing)	Year: 4
<p>844 ÷ 4 = 211</p> 	<p>Children can continue to use place value counters to share 3-digit numbers into equal groups. Children should start with the equipment outside the place value grid before sharing the hundreds, tens and ones equally between the rows. This method can also help to highlight remainders. Flexible partitioning in a part-whole model supports this method.</p>
<p>856 ÷ 4 = 214</p> 	

$$856 \div 4$$

Skill: Divide 3-digits by 1-digit (grouping)				Year: 4/5																																						
<table border="1"><thead><tr><th>Hundreds</th><th>Tens</th><th>Ones</th></tr></thead><tbody><tr><td>100 100 100 100</td><td>50 50 50 50</td><td>1 1 1 1</td></tr><tr><td>100 100 100 100</td><td>1</td><td>1 1</td></tr><tr><td></td><td></td><td>1 1</td></tr><tr><td></td><td></td><td>1 1</td></tr></tbody></table>	Hundreds	Tens	Ones	100 100 100 100	50 50 50 50	1 1 1 1	100 100 100 100	1	1 1			1 1			1 1	<table border="1"><tbody><tr><td></td><td></td><td>2</td><td>1</td><td>4</td></tr><tr><td></td><td>4</td><td>8</td><td>5</td><td>16</td></tr></tbody></table>			2	1	4		4	8	5	16	<table border="1"><thead><tr><th>Hundreds</th><th>Tens</th><th>Ones</th></tr></thead><tbody><tr><td>•••••</td><td>•••••</td><td>•••••</td></tr><tr><td>•••••</td><td>•</td><td>•••••</td></tr><tr><td></td><td></td><td>•••••</td></tr><tr><td></td><td></td><td>•••••</td></tr></tbody></table>	Hundreds	Tens	Ones	•••••	•••••	•••••	•••••	•	•••••			•••••			•••••
Hundreds	Tens	Ones																																								
100 100 100 100	50 50 50 50	1 1 1 1																																								
100 100 100 100	1	1 1																																								
		1 1																																								
		1 1																																								
		2	1	4																																						
	4	8	5	16																																						
Hundreds	Tens	Ones																																								
•••••	•••••	•••••																																								
•••••	•	•••••																																								
		•••••																																								
		•••••																																								
$856 \div 4 = 214$																																										

Children can continue to use grouping to support their understanding of short division when dividing a 3-digit number by a 1-digit number.

Place value counters or plain counters can be used on a place value grid to support this understanding. Children can also draw their own counters and group them through a more pictorial method.
